

ESHWAR CHANDRA

FRONTEND ENGINEERING LEAD

Bengaluru, India | +91 80505 44566 | mail@eshwar.me | www.eshwar.me

Frontend Engineering Lead with 17+ years of experience leading teams, mentoring engineers, and remaining hands-on across product architecture and implementation. Builds scalable React and TypeScript experiences spanning Web3, AI-enabled products, performance, and reusable frontend systems.

LEADERSHIP & DELIVERY Team leadership | Mentoring and 1:1s | Frontend architecture | Hands-on IC ownership | Stakeholder collaboration

WEB3 SPECIALIZATION EVM wallet flows | ERC-20 token rewards | DEX interfaces | Liquidity | Locks | Governance | Emissions | Base | Avalanche | Ethereum

PROFESSIONAL EXPERIENCE

Blitz Growth | Frontend Engineering Lead | Aug 2025 - Present

Internal move back to Blitz Growth; Blitz Growth and Joyride Games are sister companies.

- Lead frontend architecture and hands-on delivery for a pre-launch AI agent and ad-management platform that supports growth solutions for brands.
- Mentor frontend engineers, guide implementation decisions, and continue to own complex product work as an individual contributor.
- Partner with product and stakeholders to translate evolving platform requirements into maintainable frontend systems and workflows.

Joyride Games | Frontend Engineering Lead | Dec 2023 - Jul 2025

- Owned the frontend implementation of app.superchamps.com, a Web3 rewards platform on Base, including EVM wallet sign-in and account flows.
- Built task and campaign experiences tied to Bullet League, Tennis Champs, and X activities; user participation generated points used for CHAMP token airdrops to wallet addresses.
- Delivered frontend experiences for blackhole.xyz on Avalanche and supernova.xyz on Ethereum, spanning liquidity deposits and withdrawals, token locks, voting, voting rewards, and emissions.
- Implemented user-facing flows around the BLACK and NOVA protocol tokens while maintaining clear transaction states and product feedback.
- Led and mentored frontend team members while remaining hands-on with React, TypeScript, architecture, delivery, and production support.

Blitz Growth | UI Lead Engineer | Dec 2020 - Nov 2023

- Built reusable React, TypeScript, and AngularJS modules shared across four products, reducing duplicated frontend implementation.
- Mentored frontend developers and contributed to cross-product architecture, delivery, and engineering standards.
- Worked on product experiences including SmartBlitz and Convo within the company portfolio.

EARLIER EXPERIENCE

Quartic.ai | Senior UI Engineer / Frontend Lead | Jan 2019 - Dec 2020

- Led frontend implementation, mentored engineers, and remained hands-on with scalable product interfaces.
- Worked across frontend architecture and delivery for industrial AI product experiences.

A10 Networks | Cloud Platform UI Engineer / Lead Developer | Mar 2019 - Dec 2019

- Contributed as a full-stack lead developer using Java, JavaScript, and React for cloud-platform UI work.

EARLIER EXPERIENCE (CONTINUED)

Reflektive | Senior Software Engineer | Feb 2018 - Mar 2019

- Led browser and productivity-plugin development using React and Backbone.
- Built Chrome, Firefox, and Safari extensions and Gmail add-on experiences.

Perk.com | Lead Engineer, Browser Add-ons | Nov 2012 - Feb 2018

- Led and mentored frontend engineers while delivering browser add-ons and web products across Angular, PHP, MySQL, Memcached, and Redis stacks.
- Applied shared frontend and backend engineering practices across a high-scale consumer product portfolio.

Solivar Software Development - Technical Lead | Jul 2012 - Nov 2012 | Led a six-person team delivering APIs and administration dashboards using PHP, MySQL, Ruby on Rails, HTML, and CSS.

Crypsis Technologies (Devotion) - Software Developer | Sep 2011 - Jun 2012 | Built behavior-driven Ruby on Rails applications with MySQL, MongoDB, SCSS, Cucumber, and RSpec.

CrazyChums - Co-founder, Architect & Programmer | Sep 2009 - Aug 2011 | Designed and built a social network with search, chat, communities, photo workflows, games, and activity feeds.

TECHNICAL EXPERTISE

Frontend: React, TypeScript, JavaScript, HTML5, CSS, SCSS, responsive UI, state management, component architecture

Leadership: Frontend team leadership, mentoring, 1:1s, architecture guidance, stakeholder collaboration, agile planning, hands-on delivery

Web3: EVM wallet authentication, ERC-20 token flows and airdrops, DEX interfaces, liquidity, locks, governance, rewards, emissions, Base, Avalanche, Ethereum

Platforms & tooling: Node.js, npm, Webpack, REST APIs, Java, Spring Boot, Web Workers, Google Tag Manager, Meta Pixel, Sentry

Additional depth: AngularJS, jQuery, Backbone, PHP, Laravel, MySQL, browser extensions, Gmail add-ons

SELECTED ENGINEERING IMPACT

- Built a reusable frontend-core package adopted across multiple projects.
- Modernized legacy jQuery and Angular applications by migrating core experiences to React.
- Improved frontend responsiveness and loading behavior through component optimization and Web Worker usage.
- Scaled web products for millions of users while balancing architecture ownership, delivery, and team mentorship.
